## JANUARY 2003 HIGHLIGHTS

### Unemployment

Montana's seasonally adjusted unemployment rate continues to be lower than the U.S. rate. The state's January unemployment of 4.2 percent was 1.5 percentage points lower than the nation's.

### Earnings

Average weekly earnings for Montana's private sector production workers were up 3.2 percent over the year in January, outpacing the 2.4 percent over-the-year increase in U.S. inflation.

### Nonag Payroll Employment

*Montana Jobs (Not Seasonally Adjusted)*

Montana's nonagricultural payroll employment was up about 3,000 jobs (0.8 percentage points) over the year in January. The largest over-the-year gains were in leisure & hospitality, construction, and educational & health services.

## CHANGEOVER IN INDUSTRY CODING

Montana's industry coding has changed over to the North American Industry Classification System (NAICS) effective with January 2003 industry data. (See *nonag Montana jobs graph on this page and additional information on the back of this publication.*)

For more information:

- Reference the article "NAICS in the new century" in the 1st quarter 2002 issue of our *Montana Employment and Labor Force Trends* publication available on our website.
- Call us and say you have a question about NAICS industry classification.

3,000 copies of this publication were produced at a unit cost of 43 cents per copy for a total cost of \$1,290.00, which includes \$180.00 for printing and \$1,110.00 for distribution.

## INDUSTRY CLASSIFICATION HAS CHANGED FROM SIC TO NAICS

### Old (SIC) industry coding system

Mining  
Construction  
Manufacturing  
Transportation, Communications & Utilities  
Trade  
Finance, Insurance & Real Estate  
Services  
Government

### New (NAICS) industry coding system

Natural Resources & Mining  
Construction  
Manufacturing  
Trade, Transportation & Utilities  
Information  
Financial Activities  
Professional & Business Services  
Educational & Health Services  
Leisure & Hospitality  
Other Services  
Government

You will notice industry classification changes beginning with January 2003 nonagricultural industry employment data because of the changeover from the Standard Industrial Classification (SIC) industry coding system to the North American Industry Classification (NAICS) system.

We believe you will find NAICS an improvement over SIC, but it will take some getting used to. Among the changes:

- Mining is now part of the **natural resources & mining** supersector, along with logging.

- Most trade is now part of the **trade, transportation & utilities** supersector which includes trade, transportation, warehousing and utilities. However, hotels & other lodging places and eating & drinking places are now part of the **leisure & hospitality** supersector.

- Most of communications has moved to the new **information** supersector.

- Services has been broken out into several supersectors.
